

EMSENSE 10 EMF PROBE PLUG-IN CARD

The **ETS-Lindgren EMSENSE™ 10/40 EMF Probe Plug-in Card** provides seamless power and communication to ETS-Lindgren's laser-powered electric field probes, ensuring reliable performance without the need for external power supplies. Designed for true plug-and-play operation, the card integrates directly with the EMCenter Modular RF Platform, simplifying setup and minimizing downtime.

Each EMSENSE Modular Plug-in Card supports one ETS-Lindgren EMSENSE 10/40 electric field probe and is fully compatible with TILE!™ and other leading test automation software packages. This ensures smooth integration into automated test sequences, providing accurate, repeatable measurements for EMC compliance and advanced RF field testing applications.

Technical Specifications

Electrical	EMCenter Dependent	
Physical		
Plug-in Interface to EMCenter	F.O. Connector LASER	FC 200/230 m fiber
	F.O. Connector DATA	ST 200/230 m fiber

10 EMF PROBE PLUG-IN CARD

- Provides Power & Communication to EMSENSE 10/40 EMF Field Probe
- Plug and Play Connectivity to EMCenter
